

Join Us for the 2026 SOC-ICC ABM and Training at Driftwood Shores Resort – 88416 1st Ave. Florence, Oregon August 20 & 21

Training offerings-

“Firefighting strategies for solar and battery-related incidents” Equip your team with the knowledge to meet today’s challenges safely and effectively. Register today for this training.

Solar and battery technology is becoming more common in homes, businesses, and communities everywhere. While these systems deliver enormous benefits, they also introduce unique considerations for firefighters.

Traditional strategies must be updated to reflect the realities of responding to, investigating and inspecting this evolving technology.

This training, provided by **S.A.F.E.** (Solar And Fire Education) equips firefighters, investigators and inspectors with the latest guidance to confidently manage, investigate and inspect:

- Scooters and e-bikes
- Electric vehicles (EVs)
- Large-scale battery energy storage systems (BESS)
- Solar panel farms

Residential and commercial structure fires involving PV and ESS Participants will receive detailed Standard Operating Guidelines (SOGs) covering residential PV/ESS, commercial PV, solar farms, and EV-related fires. These editable documents can be customized to fit each department’s needs and response capabilities.

Participants will be eligible for 0.6 CEU's as SOCICC is a Preferred Provider.

Breakfast, lunch and snacks will be provided.

To register- please visit our website at SOCICC.org
